

PARTH ANAND

Product Designer, UI/UX

Noida, India | +91 72096 84084 | parthanand1705@gmail.com | [linkedin.com/in/parthanand21](https://www.linkedin.com/in/parthanand21) | parthanand.in

PROFESSIONAL SUMMARY

Product designer with 5+ years designing workflow-heavy products for operational users: recruiter dashboards, fraud-prevention systems, and multi-step DeFi flows. Starts from the problem, not the solution, validating assumptions through research before committing to design. Shipped a high-volume recruiter dashboard for a hiring platform with 1M+ active job seekers, and led onboarding for a self-custody wallet with 1M+ users. Uses AI (Claude, Midjourney) daily to accelerate prototyping, assets, and research synthesis.

CORE SKILLS

Product & UI/UX Design | **Design Systems (Figma)** | **UX Research** | **Interaction Design** | **Prototyping** | **Usability Testing** | **Accessibility (WCAG)**

EXPERIENCE

InfoEdge (Naukri.com) - Creative Designer, Product UI/UX

Nov 2023 - Present

Job Hai | Blue-collar hiring platform | 1M+ active job seekers

- Designed four core screens of the Job Hai recruiter dashboard (candidate cards, candidate management, advanced filters, bulk hiring), lifting average actions per recruiter ~11% and overall platform actions ~8%.
- Built and scaled a Figma design system (components, variables, tokens, auto-layout) across 4+ product surfaces with PMs and engineers, standardizing consistency across agile sprint cycles.
- Mentored a junior designer on the Job Hai team, reviewing interaction-design work and onboarding them onto the team's Figma design system and workflow.
- Led a fraud-prevention initiative end to end: mapped 249 blacklisted recruiters and 653 fake listings across Delhi NCR, then modeled and presented a roadmap of 6 prioritized recommendations to senior stakeholders, projecting a 68% fraud reduction and a +22-point NPS lift; approved for implementation.
- Designed hiring workflows (job discovery, trust signals, fraud reporting) for a Hindi-first, low-digital-literacy user base, applying WCAG accessibility principles to lift task success and retention.
- Ran 12+ usability sessions combining moderated contextual inquiry, unmoderated testing, and Attention Insight eye-tracking to pressure-test design assumptions before rollout.

CoinDCX - Senior Executive Designer, Product Design

Jun 2022 - Oct 2023

Okto | Self-custody Web3 DeFi wallet | 1M+ users | iOS & Android

- De-risked 3 critical flows ahead of build (empathy mapping, journey mapping, card sorting, heuristic evaluation), then designed multi-step swap, bridging, and earning flows covering edge cases, error states, and latency UI.
- Owned research-to-UI for Okto's first-time user onboarding, a core surface of a self-custody wallet serving 1M+ users across iOS and Android.
- Established a cross-platform Figma component library with design tokens to keep Okto's iOS and Android UI consistent as new flows shipped.
- Produced Lottie motion assets and visual content for two major Web3 community events (Unfold '22, '23).

Independent - Motion Designer (Freelance)

Feb 2022 - May 2022

- Delivered end-to-end animation and motion-graphics packages for YouTube creators on freelance timelines, deepening expertise in After Effects and Lottie while applying motion design to scalable UI experiences and prototyping 3D interactions with Meta AR/VR technology.

HMLC (Harsh Mann Luxury Consultancy) - Lead Designer, UI/UX & Motion

Aug 2021 - Feb 2022

Boutique luxury retail & lifestyle consultancy

- Designed responsive, mobile-first interfaces for 3+ retail clients, validating layout via A/B testing and Hotjar heatmap analysis.
- Achieved as much as a 22% increase in page conversion rate across tested variants.
- Owned the client-facing review process and developer handoff across those engagements - the primary point of contact translating client decisions into shippable specs for engineering.

Canon India - UI/UX Designer (Apprenticeship)

Jan 2021 - Jul 2021

Consumer camera redesign (concept project)

- Redesigned Canon India's camera shopping experience, simplifying discovery, comparison, and purchase journeys across 5+ campaign pages.

SKILLS & TOOLS

Design & Research: Wireframing, information architecture, motion and visual design, empathy mapping, card sorting, heuristic evaluation, A/B testing, affinity mapping, WCAG accessibility standards

Strategy & Collaboration: UX roadmapping, stakeholder presentations, design reviews, cross-functional alignment with PMs and engineering, client-facing communication

Systems & Frontend: Figma design systems (components, variables, tokens, auto-layout), HTML/CSS/JS, Three.js, WebGL, GSAP, Blender, Vercel deployment

Tools & AI Workflows: Framer, Lottie, Adobe Creative Suite, Miro, Hotjar, Amplitude, ProtoPie, Dovetail; AI-directed prototyping, asset production, and research synthesis (Claude, Midjourney)

Personal Project: papercade - solo-built, MIT-licensed open-source UI library (12 components, pixel x sketch aesthetic); strict TypeScript, automated CI/CD (typecheck, tests, auto-deploy), published to npm with a live demo - github.com/anandparth/papercade

EDUCATION & CERTIFICATIONS

B.Des. in Fashion Communication - National Institute of Fashion Technology (NIFT), New Delhi

2017 - 2021

Professional UX Design - University of Cambridge, Online (via Coursera)

Apr 2026

Foundations of UX Design - Google, Online (via Coursera)

2021
