app with complex multi-step financial workflows □ onboarding, portfolio management, and real-time trading surfaces.

- Designed AI-driven product features including portfolio insights and trade signals; addressed edge cases, error states, and model confidence in UX to ensure transparency for non-expert users.
- Implemented AI-driven usability testing methodology that resulted in a measurable reduction in new-user drop-off rates; synthesized research findings into prioritized design improvements.
- Created and maintained a comprehensive Figma component library using auto-generation and pattern detection, enabling consistent UI across a rapidly evolving product.
- Facilitated usability studies, translated findings into actionable design changes, and collaborated with cross-functional teams to ship high-quality product iterations.
- Developed branding campaigns and content for Web3 events (Unfold '22 & '23).
