

Parth Anand

Product Designer — UI/UX

+91 7209684084 parthanand1705@gmail.com Delhi, India

PROFESSIONAL SUMMARY

Customer-centric Product Designer with 5+ years of end-to-end experience across consumer apps, B2B SaaS, DeFi, and complex workflow products — practising a working-backwards design methodology grounded in JTBD research, HEART metrics, and WCAG 2.2 accessibility. Specialises in AI-native and generative AI UX: surfacing model outputs, handling latency, uncertainty, and error states, and building human-in-the-loop workflows that maintain user trust. Builds scalable Figma design systems (components, variables, tokens, dev mode) and holds working knowledge of Schema.org structured data (JobPosting, NewsArticle, Product) across job, editorial, and e-commerce platforms.

EXPERIENCE

InfoEdge

Nov 2023 – Present

Product Designer — UI/UX

- Led end-to-end redesign of the jobHai platform using a working-backwards methodology — from discovery, user interviews, and Jobs-to-be-Done framing through wireframes, interaction design, and dev-ready Figma specs — improving core hiring workflows across web and mobile.
- Designed AI-powered product surfaces including smart job-matching and personalised recommendation feeds; managed model uncertainty, confidence indicators, latency states, and error states to build transparent, trustworthy UX for blue-collar job seekers.
- Applied Schema.org JobPosting structured data knowledge during design collaboration with engineering, ensuring UX decisions aligned with Google for Jobs indexing requirements and maximising organic job listing visibility.
- Built and maintained a scalable Figma design system using components, variables, design tokens, auto-layout, and dev mode — enabling consistent UI across multiple product surfaces and accelerating developer handoff.
- Conducted usability testing using Attention Insight and synthesised HEART framework metrics (Task Success, Adoption, Retention) to validate design decisions and drive measurably reduced new-user drop-off.
- Ensured WCAG 2.2 accessibility compliance across core flows — including colour contrast, touch target sizing, and screen reader-compatible interactions — supporting inclusive design for a diverse, mass-market user base.
- Partnered with engineering and product teams to flag design debt, push back on scope, and advocate for user needs; aligned design decisions to product OKRs and activation metrics.

CoinDCX

Jun 2022 – Oct 2023

Sr. Product Designer

- Owned end-to-end product design for OKTO, a DeFi super-app with complex, multi-step financial workflows; applied design thinking methodology (empathise, define, ideate, prototype, test) across onboarding, portfolio management, and real-time trading surfaces.
- Designed AI-driven and generative AI features including portfolio insights, trade signals, and on-chain data surfaces; addressed edge cases, model confidence, and error states to ensure transparency for non-expert users in high-stakes financial decisions.
- Created comprehensive user journey maps and service blueprints to identify friction points across the end-to-end OKTO experience, translating research synthesis into prioritised design iterations that reduced new-user drop-off.
- Built and managed a Figma component library with design tokens, enabling systematic UI consistency across a rapidly evolving product; used FigJam for collaborative journey mapping and cross-functional design reviews.
- Ran usability studies and synthesised findings into actionable improvements; tracked engagement and retention metrics to validate design decisions against product KPIs.
- Developed branding campaigns, motion design assets, and content for Web3 events (Unfold '22 & '23).

EXPERIENCE (continued)

HMLC

Aug 2021 – Feb 2022

Creative Director — UI/UX & Graphic Design

- Led interface design for retail and lifestyle platforms; developed detailed user flows, information architecture, and interaction patterns optimised for intuitive navigation and conversion.
- Integrated Schema.org Product and Offer structured data considerations into design handoffs, collaborating with developers to ensure UI components mapped to rich result requirements for e-commerce SEO.
- Ran A/B testing and heatmap analysis (session recordings, click maps) to validate layout decisions; balanced brand guidelines with accessible, modern UI/UX practices across product launches.

Canon India

Jan 2021 – Jul 2021

UI/UX Designer (Apprenticeship)

- Supported web and mobile interface design for photography campaigns; developed user journeys, wireframes, and competitive analyses to inform feature design decisions.
- Delivered high-fidelity prototypes and comprehensive design documentation for developer handoff; applied inclusive design principles to ensure accessible visual hierarchy.

Ek Do Dhai

Oct 2020 – Jan 2021

Graphic & UI Designer (Internship)

- Supported UI asset creation and layout design for e-commerce projects; contributed to user flow ideation, interaction design concepts, and usability testing sessions.

Design & UX

End-to-End Product Design, Interaction Design, User Experience (UX) Design, User Interface (UI) Design, Design Systems & Design Tokens, Information Architecture, Wireframing & Prototyping, Usability Testing, User Research & Synthesis, Journey Mapping, Service Design, Jobs-to-be-Done (JTBD), AI-Powered & Generative AI UX, Human-in-the-Loop Workflows, Working Backwards Methodology, HEART Framework, A/B Testing, Visual Design, Motion Graphics & Animation

Accessibility & Standards

WCAG 2.2, Accessible & Inclusive Design, Colour Contrast & Touch Target Standards, Screen Reader Compatibility, Schema.org Structured Data (JobPosting, NewsArticle, Product, BreadcrumbList)

Tools

Figma (components, variables, tokens, auto-layout, dev mode, FigJam), ProtoPie, Principle, Framer, Adobe XD, Sketch, InVision, Miro, Zeplin, Maze, Dovetail, Amplitude, Adobe Creative Suite (Photoshop, Illustrator, After Effects, Premiere Pro), ChatGPT, Midjourney, Notion, Linear, HTML/CSS (basic)

Collaboration & Strategy

Cross-functional Leadership, Design Advocacy, Scope Management & Design Debt Flagging, OKR & KPI Alignment, Product Thinking, Agile & Sprint-based Design, Stakeholder Communication

EDUCATION

National Institute of Fashion Technology

Bachelor of Design (B.Des.)
Fashion Communication | New Delhi, 2022

Delhi Public School

Senior Secondary Certificate (CBSE)
B.S. City | 2015

CERTIFICATIONS

Professional UX Design

University of Cambridge — Coursera, 2026

Foundations of UX Design

Google — Coursera, 2021

AWARDS

Winner — Oasis Film Festival

2018 & 2019

Jamini Roy Gold Medal

Best Student in Art & Craft — Honored by the President of India, Smt. Droupadi Murmu (2016)
