

Parth Anand

Product Designer — UI/UX

+91 7209684084 parthanand1705@gmail.com Delhi, India [linkedin.com/in/parthanand](https://www.linkedin.com/in/parthanand) Portfolio: [\[your-portfolio-url\]](#)

PROFESSIONAL SUMMARY

Customer-centric Product Designer with 5+ years of end-to-end design experience across consumer apps, B2B SaaS, DeFi, and complex enterprise workflow products. Practises a working-backwards, design thinking methodology — empathising with users, defining problems with data, and validating solutions through research before a line of code is written. Experienced in AI-native and generative AI UX: surfacing model outputs, handling latency, uncertainty, and error states, and building human-in-the-loop workflows that preserve user trust. Builds scalable Figma design systems using components, variables, and design tokens; applies WCAG 2.2 accessibility and inclusive design principles across all product surfaces. Working knowledge of Schema.org structured data across job, editorial, and e-commerce platforms.

EXPERIENCE

InfoEdge

Nov 2023 – Present

Product Designer — UI/UX

- Led end-to-end redesign of jobHai using a working-backwards, customer-obsessed approach — discovery, Jobs-to-be-Done (JTBD) framing, user journey mapping, wireframes, interaction design, and dev-ready Figma specs — improving core hiring workflows across web and mobile for 1M+ users.
- Designed AI-powered and generative AI product surfaces including smart job-matching and personalised recommendation feeds; managed model uncertainty, confidence indicators, latency states, and error states to build transparent, trustworthy UX for blue-collar job seekers.
- Applied Schema.org JobPosting structured data knowledge in collaboration with engineering, ensuring job listing UX decisions aligned with Google for Jobs indexing and rich result requirements — directly improving organic listing visibility at scale.
- Built and maintained a scalable Figma design system using components, variables, design tokens, auto-layout, and dev mode — enabling consistent UI across multiple product surfaces and cutting developer handoff time significantly.
- Enforced WCAG 2.2 accessibility and inclusive design standards across all core flows — colour contrast, touch target sizing, screen reader compatibility — broadening product reach across a diverse, mass-market user base.
- Conducted usability testing (Attention Insight) and synthesised findings into iterative design improvements, tracking adoption and task-success metrics aligned with product OKRs to drive a measurable reduction in new-user drop-off.
- Partnered with engineering and product teams in agile sprint cycles to flag design debt, push back on scope, and advocate for user needs; delivered motion graphics and visual assets for marketing campaigns at scale.

CoinDCX

Jun 2022 – Oct 2023

Senior Product Designer

- Owned end-to-end product design for OKTO — a DeFi super-app with complex, multi-step financial workflows — applying design thinking (empathise, define, ideate, prototype, test) across onboarding, portfolio management, and real-time trading surfaces in agile sprint cycles.
- Designed AI-driven and generative AI features including portfolio insights, trade signals, and on-chain data visualisation; addressed edge cases, error states, and model confidence in UX to ensure transparency for non-expert users navigating high-stakes financial decisions.
- Created comprehensive user journey maps and service blueprints to surface friction points across the OKTO experience; built a Figma component library with design tokens enabling systematic UI consistency across a rapidly evolving product.

- Implemented AI-driven usability testing methodology that drove a measurable reduction in new-user drop-off rates; synthesised research findings into prioritised design improvements validated against retention and engagement KPIs.
- Collaborated cross-functionally with engineers, PMs, and data teams to ship high-quality product iterations; facilitated inclusive design reviews and developed branding and motion design assets for Web3 events (Unfold '22 & '23).

HMLC

Aug 2021 – Feb 2022

Creative Director — UI/UX & Graphic Design

- Led interface design for retail and lifestyle platforms using design thinking methodology; developed user flows, information architecture, and interaction patterns optimised for navigation and conversion; collaborated on Schema.org Product and Offer structured data integration to support rich search results.
- Ran A/B testing and heatmap analysis (click maps, session recordings) to validate layout decisions and optimise conversion; applied inclusive design principles and balanced brand guidelines with modern UI/UX practices across product launches.

Canon India

Jan 2021 – Jul 2021

UI/UX Designer (Apprenticeship)

- Supported web and mobile interface design for photography campaigns; developed user journeys, wireframes, and competitor analyses to inform feature design decisions.
- Delivered high-fidelity prototypes and comprehensive design documentation for developer handoff; applied accessible visual hierarchy and inclusive design principles throughout.

Ek Do Dhai

Oct 2020 – Jan 2021

Graphic & UI Designer (Internship)

- Supported UI asset creation and layout design for e-commerce projects; contributed to user flow ideation, interaction design concepts, and usability testing sessions.
-

SKILLS

Design & UX

End-to-End Product Design, Interaction Design, User Experience (UX) Design, User Interface (UI) Design, Design Systems & Design Tokens, Information Architecture, Wireframing & Prototyping, Usability Testing, User Research & Synthesis, Journey Mapping, Jobs-to-be-Done (JTBD), Design Thinking, Working Backwards Methodology, AI-Powered & Generative AI UX, Human-in-the-Loop Workflows, Accessibility & Inclusive Design (WCAG 2.2), Visual Design, Motion Graphics & Animation, Agile & Sprint-based Design, OKR & KPI Alignment

Tools

Figma (components, variables, design tokens, auto-layout, dev mode, FigJam), ProtoPie, Framer, Principle, Adobe XD, Sketch, InVision, Miro, Zeplin, Maze, Dovetail, Amplitude, Adobe Creative Suite (Photoshop, Illustrator, After Effects, Premiere Pro), ChatGPT, Midjourney, Notion, Linear, HTML/CSS (basic)

Web Standards

Schema.org Structured Data (JobPosting, NewsArticle, Product, BreadcrumbList), SEO-aware UX Design, Rich Result Optimisation

Collaboration & Strategy

Cross-functional Leadership, Design Advocacy, Scope Management & Design Debt Flagging, Stakeholder Communication, Research Synthesis, Written & Verbal Communication with PMs, Engineers & Leadership

EDUCATION

National Institute of Fashion Technology

Bachelor of Design (B.Des.) — Fashion Communication
New Delhi | 2022

Delhi Public School

Senior Secondary Certificate (CBSE) — PCB
B.S. City | 2015

CERTIFICATIONS

Professional UX Design

University of Cambridge — Coursera, 2026

Foundations of UX Design

Google — Coursera, 2021

AWARDS

Winner — Oasis Film Festival

2018 & 2019

Jamini Roy Gold Medal

Best Student in Art & Craft — Honored by the President of India, Smt. Droupadi Murmu (2016)
