

Parth Anand

Product Designer — UI/UX

+91 7209684084 parthanand1705@gmail.com Delhi, India [linkedin.com/in/parthanand21](https://www.linkedin.com/in/parthanand21) parthanand.in

PROFESSIONAL SUMMARY

Customer-centric Product Designer with 5+ years of end-to-end, user-centered design experience across consumer apps, B2B SaaS, DeFi, and complex enterprise workflow products. Practises a working-backwards, design thinking methodology — empathising with users, defining problems with data, and validating through rapid prototyping and continuous discovery before development begins. Experienced in AI-native and generative AI UX design across cross-platform surfaces (iOS, Android, Web); develops and governs scalable Figma design systems with components, variables, and design tokens; and applies WCAG 2.2 / Section 508 accessibility and inclusive design standards. Shapes product strategy and communicates design decisions through clear design narratives to PMs, engineers, and senior leadership. Working knowledge of Schema.org semantic markup across job, editorial, and e-commerce platforms.

EXPERIENCE

InfoEdge

Nov 2023 – Present

Product Designer — UI/UX

- Led end-to-end redesign of jobHai — applying working-backwards methodology, JTBD framing, empathy mapping, and journey mapping — delivering mobile-first, cross-platform (iOS, Android, Web) improvements across 6+ core hiring workflows for 1M+ job seekers.
- Designed AI-powered and generative AI product surfaces including smart job-matching and personalised recommendation feeds; applied rapid prototyping (lo-fi to hi-fi) to validate model confidence UI, latency states, and error states before engineering handoff.
- Collaborated with engineering on Schema.org JobPosting markup integration, aligning UX decisions with Google for Jobs rich result requirements — improving organic listing discoverability across 4+ product surfaces.
- Architected and governed a scalable Figma design system (components, variables, design tokens, auto-layout, dev mode) adopted across 4+ product surfaces; produced design documentation and conducted design QA to ensure pixel-accurate developer handoff.
- Achieved WCAG 2.2 AA and Section 508 accessibility compliance across 6+ core user flows — colour contrast ratios, touch target sizing, screen reader compatibility — supporting inclusive design for a diverse, mass-market user base.
- Conducted 12+ usability testing sessions (Attention Insight, contextual inquiry) and synthesised findings into iterative improvements; tracked adoption, task-success, and retention metrics aligned with product OKRs — driving measurable reduction in new-user drop-off.
- Partnered with PMs and engineers in agile sprint cycles to flag design debt and advocate for users; shaped product strategy discussions and presented design decisions to senior leadership through compelling design presentations.

CoinDCX

Jun 2022 – Oct 2023

Senior Product Designer

- Owned end-to-end product design for OKTO — a DeFi super-app embedded within CoinDCX's 14M+ user ecosystem — applying design thinking (empathise, define, ideate, prototype, test) and rapid prototyping across complex multi-step onboarding, portfolio management, and real-time trading workflows in agile sprint cycles.
- Architected AI-driven and generative AI features including portfolio insights, trade signals, and on-chain data visualisation dashboards; addressed edge cases, error states, and model confidence indicators to ensure transparency for non-expert users in high-stakes financial decisions.

- Conducted empathy mapping, user journey mapping, card sorting, and heuristic evaluation across 3 critical user flows; developed a Figma component library with design tokens enabling systematic UI consistency, and produced comprehensive design documentation for developer handoff.
- Implemented AI-assisted usability testing methodology; synthesised research findings into prioritised design improvements across mobile-first and responsive web surfaces, validated against retention, engagement, and drop-off KPIs.
- Collaborated cross-functionally with engineers, PMs, and data science teams in agile sprints; conducted design QA on shipped features and advanced product strategy for new DeFi primitives across iOS, Android, and Web platforms.
- Facilitated inclusive design reviews with cross-functional stakeholders; developed branding campaigns, Lottie-based motion design assets, and visual content for Web3 events (Unfold '22 & '23).

HMLC

Aug 2021 – Feb 2022

Lead Product Designer — UI/UX & Graphic Design

- Led research-driven interface design for 3+ retail and lifestyle clients using design thinking methodology; developed responsive, mobile-first user flows, information architecture, and interaction patterns optimised for conversion; collaborated on Schema.org Product and Offer markup integration for rich search results.
- Spearheaded competitive benchmarking, A/B testing, and heatmap analysis (Hotjar — click maps, session recordings) to validate layout decisions; achieved measurable conversion uplift; applied inclusive design principles and WCAG-aligned visual standards across product launches.

Canon India

Jan 2021 – Jul 2021

UI/UX Designer (Apprenticeship)

- Crafted responsive, mobile-first web and mobile interfaces for 5+ photography campaigns; conducted user journey mapping, wireframing, and competitive analysis to inform feature decisions.
- Delivered high-fidelity prototypes and comprehensive specifications for engineering implementation; applied accessible visual hierarchy, inclusive design principles, and platform design guidelines throughout.

Ek Do Dhai

Oct 2020 – Jan 2021

Graphic & UI Designer (Internship)

- Supported responsive UI asset creation and layout design for e-commerce projects, encompassing user flow ideation, interaction design concepts, and moderated usability testing sessions.

SKILLS

Design & UX

End-to-End Product Design, User-Centered Design, Interaction Design, UX & UI Design, Design Systems & Design Tokens, Design Systems Governance, Information Architecture, Wireframing, Low-Fidelity & High-Fidelity Prototyping, Rapid Prototyping, Usability Testing, User Research, Journey Mapping, Empathy Mapping, Jobs-to-be-Done (JTBD), Design Thinking, Working Backwards, Continuous Discovery, AI-Powered & Generative AI UX, Human-in-the-Loop Workflows, Data Visualization, Cross-Platform Design (iOS, Android, Web), Mobile-First & Responsive Design, Accessibility & Inclusive Design (WCAG 2.2, Section 508), Product Strategy, Enterprise UX, Visual Design, Motion Graphics & Animation, Agile & Sprint-based Design, OKR & KPI Alignment, Design QA, Design Documentation, Developer Handoff

Research Methods

Contextual Inquiry, Card Sorting, Empathy Mapping, Tree Testing, Eye-Tracking Analysis, Heuristic Evaluation, Competitive Benchmarking, A/B Testing, Usability Testing, Synthesis & Affinity Mapping

EDUCATION

National Institute of Fashion Technology

Bachelor of Design (B.Des.) — Fashion Communication
New Delhi | 2022

Delhi Public School

Senior Secondary Certificate (CBSE) — PCB
B.S. City | 2015

CERTIFICATIONS

Professional UX Design

University of Cambridge — Coursera, 2026

Foundations of UX Design

Google — Coursera, 2021

AWARDS

Winner — Oasis Film Festival

2018 & 2019

Tools

Figma (expert-level), FigJam, ProtoPie, Framer, Principle, Lottie, Adobe XD, Sketch, InVision, Miro, Zeplin, Maze, Dovetail, UserTesting, Hotjar, Amplitude, Google Analytics, Jira, Notion, Linear, Adobe Creative Suite (Photoshop, Illustrator, After Effects, Premiere Pro), ChatGPT, Midjourney, HTML/CSS (basic)

Web Standards

Schema.org Markup (JobPosting, NewsArticle, Product, BreadcrumbList), SEO-aware UX Design, Rich Result Optimisation

Collaboration & Strategy

Cross-functional Leadership, Design Advocacy, Scope Management & Design Debt Flagging, Stakeholder Communication, Design Storytelling & Presentations, Research Synthesis, Written & Verbal Communication with PMs, Engineers & Senior Leadership

Jamini Roy Gold Medal

Best Student in Art & Craft — Honored by the President of India, Smt. Droupadi Murmu (2016)
